TRAINING HAZWOPER

American Environmental Services training for HAZWOPER includes a computerized color presentation and discussion, with experienced facilitators to increase student to instructor contact. We utilize a hands on pump, skimmer and boom deployment, case studies of actual marine casualties and a tabletop spill drill for an oil or hazardous material incident.

- 40-Hour Hazardous Material Specialist
- 24-Hour Hazardous Material Technician
- 8-Hour Annual Refresher
- 8-Hour First Response Operations Level
- 8-Hour Incident Command Systems (ICS)
- 8-Hour HAZWOPER Awareness

PLANS

SOPEP: These SOPEP's meet the requirements of MARPOL 73/78 and provide guidelines to follow in emergency situations. Tailored to client specific vessels or fleet needs for vessels over 400 gross tons.

OPA 90/VRP: These are required by the USCG and states for tank vessels/barges transporting oil as well as shore side terminals storing oil in excess of 10,000 gallons.

ICS: The ICS manuals are custom designed to meet each company's needs and insure a well organized response to any emergency situation.

Facility Contingency Plans: These manuals are for oil and chemical facilities to meet standards set forth by federal and state governments.

Vessel Security Plans: These plans are a USCG requirement for vessels, custom written to meet the needs of your operation and personnel resources.

Port Facility Security Plans: These plans are a USCG requirement for port facility's and are custom written to meet your physical layout, operational needs, and personnel resources.
